Forward Looking Statements

Statements used in this press release that relate to future plans, events, financial results, prospects or performance are forward-looking statements as defined under the Private Securities Litigation Reform Act of 1995. Actual results may differ materially from those anticipated as a result of certain risks and uncertainties, including but not limited to the ability of Salem to close and integrate announced transactions, market acceptance of recently launched music formats, competition in the radio broadcast, Internet and publishing industries and from new technologies, adverse economic conditions, and other risks and uncertainties detailed from time to time in Salem's reports on Forms 10-K, 10-Q, 8-K and other filings filed with the Securities and Exchange Commission. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Salem undertakes no obligation to update or revise any forward-looking statements to reflect new information, changed circumstances or unanticipated events.

Regulation G

The company's results include non-GAAP financial measures of station operating income, which is defined as net broadcasting revenue minus broadcasting operating expenses, and EBITDA, which is defined by the SEC as net income plus interest expense, tax, depreciation and amortization and minus interest income. Salem's definition of station operating income is not necessarily comparable to similarly titled measures reported by other companies. Salem has provided supplemental information, as an attachment to this press release, which reconciles non-GAAP financial measures to the most directly comparable financial measures prepared in accordance with generally accepted accounting principles ("GAAP").

Station operating income and EBITDA are not measures of performance calculated in accordance with GAAP; they should viewed as a supplement to and not a substitute for results of operations presented on the basis of GAAP. The company believes these non-GAAP financial measures, when considered in conjunction with the most directly comparable GAAP financial measures, are useful to investors because they are generally recognized by the radio broadcasting industry as a tool to provide useful measures of the company's operating performance and to apply valuation methodologies for companies in the media, entertainment and communications industries. These measures are used by investors and by analysts who report on the industry to provide comparisons between broadcasting groups. Salem uses these non-GAAP financial measures as key measures of operating efficiency and profitability.
