SALEM COMMUNICATIONS ANNOUNCES STRONG THIRD QUARTER 2004 RESULTS
Third Quarter Same Station Revenue and Same Station Operating Income Increase 10.6% and 22.6%, Respectively

CAMARILLO, CA November 3, 2004 – Salem Communications Corporation (Nasdaq: SALM), the leading radio broadcaster focused on Christian and family themes programming, announced today results for the third quarter ended September 30, 2004.

Commenting on these results, Edward G. Atsinger III, President and CEO said, “Our third quarter 2004 net broadcasting revenue and station operating income growth of 11.0% and 18.8%, respectively, will, once again, significantly exceed the performance of the overall radio industry. This strong performance is fueled by growth at our start-up and developing stations, in particular, our Contemporary Christian Music stations which achieved an increase of 16.5% in net broadcasting revenue and 36.0% in station operating income compared to last year.”

Mr. Atsinger continued, “Additionally, during the quarter we announced a radio station exchange with Univision Communications, Inc. This station exchange presents a unique opportunity for Salem to expand our presence in four attractive major markets – Chicago, Houston, Dallas and Sacramento. This transaction upgrades our station group, offers an opportunity to significantly improve the return from two stations which have been underperforming, and enhances our network business by providing strong anchor affiliates in Chicago and Houston, the third and seventh largest markets in the country, respectively.”

Third Quarter 2004 Results

For the quarter ended September 30, 2004, net broadcasting revenue increased 11.0% to \$47.3 million from \$42.6 million for the same period last year. Regulation G

Station operating income, EBITDA and Adjusted EBITDA are financial measures not prepared in accordance with generally accepted accounting principles ("GAAP"). Station operating income is defined as net broadcasting revenues minus broadcasting operating expenses. EBITDA is defined as net income before interest, taxes, depreciation and amortization. Adjusted EBITDA is defined as EBITDA adjusted for the cost of a denied tower site and license upgrade, the loss on early redemption of long-term debt, gain or loss on disposal of assets and the loss from discontinued operations, net of tax. In addition, Salem has provided supplemental information as an attachment to this press release, reconciling these non-GAAP financial measures to the most directly comparable financial measures prepared in accordance with GAAP. The company believes these non-GAAP financial measures, when considered in conjunction with the most directly comparable GAAP financial measures, provide useful measures of the company's operating performance.

Station operating income, EBITDA and Adjusted EBITDA are generally recognized by the radio broadcasting industry as tools in measuring performance and in applying valuation methodologies for companies in the media, entertainment and communication industries. Investors and analysts who report on the industry use these measures to provide comparisons between broadcasting groups. Station operating income, EBITDA and Adjusted EBITDA are not measures of liquidity or of performance in accordance with GAAP, and should be viewed as supplements to and not substitutes for, or superior to, the company's results of operations presented on a GAAP basis such as operating income and net income. In addition, Salem's definitions of station operating income, EBITDA and Adjusted EBITDA are not necessarily comparable to similarly titled measures employed by other companies.
