Regulation G

Station operating income, non-broadcast operating income, EBITDA and Adjusted EBITDA are financial measures not prepared in accordance with generally accepted accounting principles ("GAAP"). Station operating income is defined as net broadcast revenues minus broadcast operating expenses. Non-broadcast operating income is defined as non-broadcast revenue minus non-broadcast operating expenses. EBITDA is defined as net income before interest, taxes, depreciation and amortization. Adjusted EBITDA is defined as EBITDA before gain or loss on the disposal of assets and non-cash compensation expense. In addition, Salem has provided supplemental information as an attachment to this press release, reconciling these non-GAAP financial measures to the most directly comparable financial measures prepared in accordance with GAAP. The company believes these non-GAAP financial measures, when considered in conjunction with the most directly comparable GAAP financial measures, provide useful measures of the company's operating performance.

Station operating income, non-broadcast operating income, EBITDA and Adjusted EBITDA are generally recognized by the broadcast industry as important measures of performance and are used by investors as well as analysts who report on the industry to provide meaningful comparisons between broadcast. Station operating income, non-broadcast operating income, EBITDA and Adjusted EBITDA are not a measure of liquidity or of performance in accordance with GAAP, and should be viewed as a supplement to and not a substitute for, or superior to, the company's results of operations presented on a GAAP basis such as operating income and net income. In addition, Salem's definitions of station operating income, non-broadcast operating income, EBITDA and Adjusted EBITDA are not necessarily comparable to similarly titled measures reported by other companies.
